TECHNICAL PROJECTS

Job Card UI

2026

React.js

[GitHub Repository](#) [Live Demo](#)

Developed a responsive job and salary comparison dashboard using modular React components and state management, with intuitive UI for seamless data visualization and comparison across different job roles.

Weather App

2025

HTML/CSS, JavaScript, Weather API

[GitHub Repository](#) [Live Demo](#)

Built a responsive weather application by integrating a public Weather API to fetch and render real-time, location-based weather data. Implemented features like dynamic city search, unit conversion (°C/°F), and 3-day weather forecasting with robust error handling.

Node Chat API

2025

Node.js, Express.js, MongoDB, JavaScript

[GitHub Repository](#) [Live Demo](#)

Developed a full-stack messaging application with RESTful APIs supporting full CRUD operations (Create, Read, Update, Delete), with MongoDB schemas for message storage and user management and seamless client-server communication via Express.js.

PROBLEM SOLVING & DATA STRUCTURES

[LeetCode Profile](#)

Proficient in Data Structures & Algorithms using Java, with focus on Arrays, Strings, Recursion, and Sorting. Comfortable analyzing Time and Space Complexity (Big-O) to write optimized, scalable code, and an active participant in technical hackathons and coding contests, including Codex Hackathon.

EDUCATION

Shri Ramswaroop Memorial University
